Stick together and check-in. Nights out are always more fun—and safer—with friends. Look out for each other and if you're going out, tell a friend or roommate. Don't forget to check in with them, let them know you're safe, and **share your ride.**

Remember to Check Your Ride, everytime. Before you hop in your next ride, take a second to double-check the app for your driver's information. Follow these 3 steps to make sure you get into the right car:

1. Match the license plate number
2. Match the car make and model
3. Check the driver's photo

You can also turn on the Verify Your Ride safety feature in your app settings to receive a unique PIN for every ride that you'll share with your driver to help make sure you're getting in the right vehicle.
