

iXP Corporation is an IACLEA Titanium Sponsor, yet many IACLEA members may not know what we can offer your campus and your community. In short, iXP is a public safety and security consulting company that is product / vendor independent and has expertise in 4 critical areas: governance, operations, technology and facilities.

<p style="text-align: center;"><b>Facility</b></p> <ul style="list-style-type: none"> <li>• Renovation of Comm. Center / EOC</li> <li>• Temporary / Transition Facilities</li> <li>• New Construction (Comm. Center / EOC)</li> <li>• Design &amp; Architectural Support</li> <li>• Space Planning &amp; Lighting</li> <li>• Console / Work Area &amp; Chair Design</li> <li>• All Technical Specifications</li> <li>• Quality Assurance / Control</li> </ul> <hr/> <p style="text-align: center;"><b>Technology</b></p> <ul style="list-style-type: none"> <li>• Legacy Technology Replacement</li> <li>• Radio, AVL &amp; Telephone (911 &amp; 311)</li> <li>• Interoperability</li> <li>• Information Sharing</li> <li>• System, Application &amp; Infrastructure Integration</li> <li>• Incident Predictive CCTV (IP-CCTV / SMART - CCTV)</li> <li>• Ongoing Technology Support &amp; Refreshment</li> </ul>	<p style="text-align: center;"><b>Operations</b></p> <ul style="list-style-type: none"> <li>• Transition Planning &amp; Migration</li> <li>• Co-Location / Consolidation</li> <li>• Process / Work Flow Improvement</li> <li>• Staffing Models</li> <li>• Policies and Procedures (SOPs)</li> <li>• Training &amp; Instruction Material</li> <li>• On-scene Incident Command</li> </ul> <hr/> <p style="text-align: center;"><b>Governance</b></p> <ul style="list-style-type: none"> <li>• Facilitation / Consensus</li> <li>• Strategy and Direction</li> <li>• Business Case Development</li> <li>• Stakeholder / Media Management</li> <li>• Intergovernmental Agreements</li> <li>• Memorandums of Understanding</li> <li>• Standards and Best Practices</li> <li>• Program Management</li> <li>• Funding Provisions</li> </ul>

There are numerous areas where iXP can assist your campus in enhancing public safety and security. iXP's technique for planning and delivering projects involves a Phased approach. This approach has been successful for many of our College/University clients. The phases include a visioning session with the leadership to identify and define the future operational plan. Each phase of the engagement provides separate and distinct deliverables that are the building blocks of a plan to achieve the vision.

- **Visioning Session** - Identify & document the vision for future public safety/security components.
- **PHASE I: ASSESSMENT:** iXP reviews the existing legacy environment and performs an examination and analysis. iXP documents the functionality/performance and life-cycle of current safety/ security systems, evaluates security operations and policy/procedures, and/or reviews/assesses current and planned facilities. *Risks and recommendations* are provided for each system, facility, and/or operation component.
- **PHASE II: BUSINESS CASE & SOLUTION DESIGN:** iXP develops detailed designs for selected recommendations. This provides the prioritization and roadmap for implementing the technology, staffing and other operational recommendations made during the assessment. This becomes the Master Plan and includes the details for each recommendation, equipment specifications, *budgetary capital and operating budget estimates* and implementation and support/maintenance and technology refreshment schedules.
- **PHASE III: IMPLEMENTATION:** iXP provides program management services to manage the implementation of the selected recommendations and master plan elements. iXP can provide ongoing services for procurement support (RFP development and review, specifications, contract negotiation support) to efficiently manage the investments in each project. This includes *project management* and oversight of: vendor product installations, operator and system administration training, monitors, operations managers, and administrators.
